ECHA Webinar: Getting prepared to comply with Annex VIII CLP

The European Chemicals Agency **ECHA** has **just published the date for webinar to provide the latest information for getting prepared to submit the information on hazardous mixtures to poison centres**. During the webinar ECHA will explain the procedure step by step and there will be a live panel of experts to answer questions.

The webinar will be organised on **11 December 2018** and will take place from 11:00 - 12:00 EET (**10:00 - 11:00 CET**). Experts interested in participating in the webinar must <u>register online</u> via the <u>ECHA website</u>.

Annex VIII of Regulation (EC) No 1272/2008 (CLP) in the present form is inapplicable for mortar manufactures and many other sectors and we expect the workability study to present solutions for the issues we

ing Paul any poisor something that very ill if you sonec

have presented which are like to require profound changes to the present legal text. Furthermore we expect this changes to also have profound implication on the IT tools and the notification portal. Yet it could still be interesting to participate in the webinar to have a better understanding of the submission procedure and the complexity of the task. The EMO secretariat recommends to register fast as the number of participants will certainly be limited. As announced on the ECHA website, the presentations of the webinar will be published afterwards.

Meanwhile, we have received several confirmations from EMO members about actions taken at national level to support the joint call for a postponement of applicability dates. The secretariat would like to take the opportunity to thank EMO members for their effort and support at national level!

Registered Address:

EMO 68 Boulevard du Souverain 1170 Bruxelles / Belgium
